

Dear hiring team,

I am applying for the Production Administrator position because it brings together cultural production, structured administration and international touring—areas closely aligned with my four years of experience coordinating cultural programmes, touring installations and public events.

At Atelier Horizon, I delivered six temporary productions from brief to opening, coordinating artists, curators, fabricators, venues and accessibility partners. I managed schedules, supplier consultations and budgets up to EUR 180,000, supported by decision logs and weekly risk reviews. This experience would enable me to contribute reliable financial, administrative and operational follow-up across 3D Family Production's concurrent artistic projects.

My work has also required clear, accessible documentation: installation plans, transport records, programme briefs and post-event reports for internal and external stakeholders. For the touring installation *City in Motion*, I coordinated three venue adaptations, lender agreements, transport and installation crews. This combination of structured records and multi-partner logistics provides a strong foundation for supporting international touring operations.

I would bring professional English at C1 level, Spanish at B2 and experience coordinating performances across multiple venues. I am keen to apply this cultural-production background to the music and live-performance sector while supporting the careful delivery of 3D Family Production's projects in France and internationally.

Yours sincerely,
Maya Laurent
